JASIS
JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE

Subject Index to Volume 43

Access Structure
a two-level structure for textual databases to support hypertext access, 432-447

Africa
the state and society: intervention in the creation of scientific information in developing countries, 323-333

Aging of Books
a study of the problem of the aging of books in university libraries: strategies for countering its effects, 501-505

Algorithms
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476

ANSI Z39.50
information technology standards for libraries, 566-570

Archivists
the American archival profession and information technology standards, 571-575

Art History Information Program (AHIP)
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476

Artificial Intelligence. ***See also*** **Expert Systems**
intelligent information retrieval: an introduction, 175-182

Authorship
breakdown of the robustness property of Lotka's law: the case of adjusted counts for multiauthorship attribution, 645-647

Automatic Classification
experiments in automatic Library of Congress classification, 130-148
correction [letter to the editor], 518

Automatic Indexing
improving disambiguation in FASIT, 101-114

Bibliometrics
an analysis of personal journal subscriptions of university faculty. part I. science, 28-33
breakdown of the robustness property of Lotka's law: the case of adjusted counts for multiauthorship attribution, 645-647
the convergence of information science and communication: a bibliometric analysis, 397-411
information interactions between members of science-profession dyads as reflected by journal use: ichthyology and fisheries biology, 276-283
information science and scientists: *JASIS*, 1972-1990, 583-593
internal comparison of departments' research performance in the humanities, 249-256
the laboratory as a productivity and citation unit in the publications of an experimental-psychology specialty, 639-643
note on a strongly unimodal bibliometric size frequency distribution, 299-303
on the objectives of citation analysis: problems of theory and method, 448-451
on the origin and meaning of bibliometric indicators: journals in the social sciences, 1886-1985, 477-487
origins of bibliometrics, citation indexing, and citation analysis: the neglected legal literature, 337-339
the persistence of fraud in the literature: the Darsee case, 488-493
the skewness of science, 628-638

Book Collections
a study of the problem of the aging of books in university libraries: strategies for countering its effects, 501-505

Book Reviews
COBOL Programs for Libraries, 456
Dilemmas in the Study of Information: Exploring the Boundaries of Information Science, 674-675
Indexing and Abstracting in Theory and Practice, 456
United States Government Information Policies: Views and Perspectives, 455
United States Scientific and Technical Information Policies: Views and Perspectives, 455

Boundary-Spanning Communication
informal and formal channels in boundary-spanning communication, 257-267

Bradford's Law
hierarchical distributions and Bradford's Law, 494-500
journal productivity distribution: quantitative study of dynamic behavior, 412-421

Brookes, B. C. (Bertie)
in memoriam B. C. (Bertie) Brookes, 1910-1991, 273-274, 274-275

Browsing
a gray code based ordering for documents on shelves: classification for browsing and retrieval, 312-322

Bush, Vannevar
Bush's contribution to the vision of *electronic* information systems [letter to the editor], 676-677
rejoinder [letter to the editor], 677-678
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657

Calibration
when is the probability ranking principle suboptimal?, 1-14

CANSEARCH
intelligent information retrieval: an introduction, 175-176

Cataloging
a multiple-observation approach in knowledge acquisition for expert systems: a case study, 506-517

Catalogs, Public. ***See*** **Online Public Access Catalogs**

Citation Analysis. ***See*** **Bibliometrics**

Citation Indexing
origins of bibliometrics, citation indexing, and citation analysis: the neglected legal literature, 337-339

CITE System
user-friendly systems instead of user-friendly front-ends, 168-169

Classification
experiments in automatic Library of Congress classification, 130-148
correction [letter to the editor], 518
a gray code based ordering for documents on shelves: classification for browsing and retrieval, 312-322
the nature and boundaries of information science(s) [letter to the editor], 678-680
rejoinder [letter to the editor], 680-682

Clustering
a model for word clustering, 616-627

Cognitive Modeling
validation of the repertory grid for use in modeling knowledge, 115-129

Collection Management
a study of the problem of the aging of books in university libraries: strategies for countering its effects, 501-505

Communication
the communication-information relationship in system-theoretic perspective, 15-27
the convergence of information science and communication: a bibliometric analysis, 397-411
informal and formal channels in boundary-spanning communication, 257-267

Communications Standards
consortia in the standards development process, 559-565
information technology standards for libraries, 566-570
surrounded by standards, there is a simpler view, 526-530

Comparator
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657

Computer-Human Interface. ***See*** **Human-Computer Interface**

Computer Interconnection Standards. ***See*** **Communications Standards**

Concentration Measures
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395
a note on a result of Rousseau for concentration measures (Brief Communication), 452-454

Copyright
[letter to the editor], 96-97

Cost of Information. ***See*** **Market Value of Information**

Darsee, John
the persistence of fraud in the literature: the Darsee case, 488-493

Data Redundancy
a general treatment of data redundancy in a fuzzy relational data model, 304-311

Developing Nations
a Micronesian information system: an application of EATPUT model, 594-601
the state and society: intervention in the creation of scientific information in developing countries, 323-333

Disambiguation
improving disambiguation in FASIT, 101-114

Distribution Curve. ***See*** **Frequency Distribution**

Diversity Measures
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395

Document Retrieval. ***See*** **Information Retrieval**

Economics
invisible hands and visible advisors: an economic interpretation of standardization, 538-549

End-User Searchers
interfaces for end-user information seeking, 156-163

EP-X
intelligent information retrieval: an introduction, 178-179

ESPRIT. ***See*** **European Strategic Program for Research into Information Technology (ESPRIT)**

Europe
speech technology developments in Europe (European Research Letter), 92-95

European Strategic Program for Research into Information Technology (ESPRIT)
Europe, ESPRIT II, and information retrieval (European Research Letter), 89-91

Expert Systems
intelligent information retrieval: an introduction, 175-182
a multiple-observation approach in knowledge acquisition for expert systems: a case study, 506-517
online-expert: an expert system for online database selection, 340-357

Extended-Boolean Retrieval System
topology of document retrieval systems, 664

Falsification of Research Data
the persistence of fraud in the literature: the Darsee case, 488-493

FASIT
improving disambiguation in FASIT, 101-114

Fisheries Biology
information interactions between members of science-profession dyads as reflected by journal use: ichthyology and fisheries biology, 276-283

Fraud in Literature
the persistence of fraud in the literature: the Darsee case, 488-493

Frequency Distribution
breakdown of the robustness property of Lotka's law: the case of adjusted counts for multiauthorship attribution, 645-647
hierarchical distributions and Bradford's Law, 494-500
journal productivity distribution: quantitative study of dynamic behavior, 412-421
note on a strongly unimodal bibliometric size frequency distribution, 299-303
the skewness of science, 628-638

Front-End Systems and Software
user-friendly systems instead of user-friendly front-ends, 164-174

Funding of Research
information science and scientists: *JASIS*, 1972-1990, 583-593

Fuzzy Models
a general treatment of data redundancy in a fuzzy relational data model, 304-311
topology of document retrieval systems, 663-664

Getty Art History Information Program (AHIP)
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476

Goldberg, Emanuel
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
the retrieval problem in photography (1932), 295-298

Government
the state and society: intervention in the creation of scientific information in developing countries, 323-333

Grammars
a two-level structure for textual databases to support hypertext access, 432-447

Graphical Information
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383

Gray Code
a gray code based ordering for documents on shelves: classification for browsing and retrieval, 312-322

Greek Civilization
an interface to classical Greek civilization, 192-201

Human-Computer Interface
intelligent information retrieval: an introduction, 175-182
an interface to classical Greek civilization, 192-201
interfaces for end-user information seeking, 156-163
introduction and overview, 152-155
models for hypertext, 183-191
user-friendly systems instead of user-friendly front-ends, 164-174

Humanities
internal comparison of departments' research performance in the humanities, 249-256

Hypertext
an interface to classical Greek civilization, 192-201
models for hypertext, 183-191
a two-level structure for textual databases to support hypertext access, 432-447

Ichthyology
information interactions between members of science-profession dyads as reflected by journal use: ichthyology and fisheries biology, 276-283

IDF. ***See*** **Inverse Document Frequency (IDF)**

Index Terms
an information-theoretic measure of term specificity, 54-61

Indexing
improving disambiguation in FASIT, 101-114

Information
the communication-information relationship in system-theoretic perspective, 15-27
the state and society: intervention in the creation of scientific information in developing countries, 323-333

Information Commodities
on the market value of information commodities. I. the nature of information and information commodities, 225-232

Information Commodities *(Continued)*
on the market value of information commodities. II. supply price, 233-241
on the market value of information commodities. III. demand price, 242-248

Information Exchange
intelligent OCR processing, 422-431
technology transfer policy: its role as a scientific and technical information policy and its impact on technological growth, 80-88

Information Retrieval
Bush's contribution to the vision of *electronic* information systems [letter to the editor], 676-677
rejoinder [letter to the editor], 677-678
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
Europe, ESPRIT II, and information retrieval (European Research Letter), 89-91
evaluation of advanced retrieval techniques in an experimental online catalog, 34-53
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657
psychological relevance and information science, 601-615
the retrieval problem in photography (1932), 295-298
retrieval testing by the comparison of statistically independent retrieval methods, 358-370
the size of retrieval sets, 72-79
topology of document retrieval systems, 658-673
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383
when is the probability ranking principle suboptimal?, 1-14

Information Science
the communication-information relationship in system-theoretic perspective, 15-27
the convergence of information science and communication: a bibliometric analysis, 397-411
information science and scientists: *JASIS*, 1972-1990, 583-593
the nature and boundaries of information science(s) [letter to the editor], 678-680
rejoinder [letter to the editor], 680-682

Information Seeking Behavior
interfaces for end-user information seeking, 156-163

Information Systems
entering stage III. the convergence of the stage hypotheses, 204-209
a Micronesian information system: an application of EATPUT model, 594-601
an object-based requirements modeling method, 62-71

Information Technology Standards. *See* Standards

Intellectual Technologies
an empirically grounded model of the adoption of intellectual technologies, 210-224

Inverse Document Frequency (IDF)
an information-theoretic measure of term specificity, 54-61

I^3R
intelligent information retrieval: an introduction, 176-177

ISI
[letter to the editor], 96-97

Journal Analysis. *See* Bibliometrics

Journal of the American Society for Information Science (JASIS)
honoring the *JASIS* referees over the last seven years (Editorial), 335-336
information science and scientists: *JASIS*, 1972-1990, 583-593

Journal Productivity Distribution
hierarchical distributions and Bradford's Law, 494-500
journal productivity distribution: quantitative study of dynamic behavior, 412-421
the laboratory as a productivity and citation unit in the publications of an experimental-psychology specialty, 639-643
the skewness of science, 628-638

Journal Subscriptions
an analysis of personal journal subscriptions of university faculty. part I. science, 28-33

Knowledge Acquisition
a multiple-observation approach in knowledge acquisition for expert systems: a case study, 506-517

Knowledge Bases
online-expert: an expert system for online database selection, 340-357

Kolmogorov-Smirnov Test
Lotka's law and the Kolmogorov-Smirvov Test: an error in calculation (Brief Communication), 149-150
correction (letters), 518

Legal literature
origins of bibliometrics, citation indexing, and citation analysis: the neglected legal literature, 337-339

Leimkuhler Curve
a note on a result of Rousseau for concentration measures (Brief Communication), 452-454

Library Collections
a study of the problem of the aging of books in university libraries: strategies for countering its effects, 501-505

Library of Congress Classification
experiments in automatic Library of Congress classification, 130-148
correction [letter to the editor], 518
a gray code based ordering for documents on shelves: classification for browsing and retrieval, 320-321

Lorenz Curve
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395
a note on a result of Rousseau for concentration measures (Brief Communication), 452-454

Lotka's Law
breakdown of the robustness property of Lotka's law: the case of adjusted counts for multiauthorship attribution, 645-647
the laboratory as a productivity and citation unit in the publications of an experimental-psychology specialty, 639-643
Lotka's law and the Kolmogorov-Smirvov Test: an error in calculation (Brief Communication), 149-150
correction (letters), 518

Maps
a multiple-observation approach in knowledge acquisition for expert systems: a case study, 506-517

Market Value of Information
on the market value of information commodities. I. the nature of information and information commodities, 225-232
on the market value of information commodities. II. supply price, 233-241
on the market value of information commodities. III. demand price, 242-248

Mathematical Models
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395

Memex
Bush's contribution to the vision of *electronic* information systems [letter to the editor], 676-677
rejoinder [letter to the editor], 677-678
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657

Microfilm
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657
the retrieval problem in photography (1932), 295-298

Micronesia
a Micronesian information system: an application of EATPUT model, 594-601

Models and Modeling
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395
an empirically grounded model of the adoption of intellectual technologies, 210-224
a general treatment of data redundancy in a fuzzy relational data model, 304-311
an object-based requirements modeling method, 62-71
validation of the repertory grid for use in modeling knowledge, 115-129

Multimedia
multimedia: what else? [letter to the editor], 644

Muscat System
user-friendly systems instead of user-friendly front-ends, 169-170

Museums
a user community discovers IT standards, 576-578

Name-Matching Algorithms
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476

Natural Language Queries
the effectiveness of stemming for natural-language access to Slovene textual data, 384-390
user-friendly systems instead of user-friendly front-ends, 164-174

News Retrieval Tool (NRT)
user-friendly systems instead of user-friendly front-ends, 170-172

Obituaries
in memoriam B. C. (Bertie) Brookes, 1910-1991, 273-274, 274-275

Object-Based Systems
an object-based requirements modeling method, 62-71

Online Databases
online-expert: an expert system for online database selection, 340-357

Online Public Access Catalogs
evaluation of advanced retrieval techniques in an experimental online catalog, 34-53

Optical Character Recognition (OCR)
intelligent OCR processing, 422-431

Otlet, Paul
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 290-291

Pacific Basin Countries
a Micronesian information system: an application of EATPUT model, 594-601

Perseus Project
an interface to classical Greek civilization, 192-201

Personal Construct Theory
validation of the repertory grid for use in modeling knowledge, 115-129

Personal Names
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476

Photography
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
the retrieval problem in photography (1932), 295-298

PLEXUS
intelligent information retrieval: an introduction, 179-180

Poisson Approximation
a model for word clustering, 616-627

Positive Reinforcement
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395

Price of Information. ***See*** **Market Value of Information**

PRISE System
user-friendly systems instead of user-friendly front-ends, 165-168

Probabilistic Retrieval Systems
evaluation of advanced retrieval techniques in an experimental online catalog, 34-53
when is the probability ranking principle suboptimal?, 1-14

Probability Models
[letters to the editor], 96
a model for word clustering, 616-627
topology of document retrieval systems, 665-666

Productivity. ***See*** **Journal Productivity Distribution**

Psychological Relevance
psychological relevance and information science, 601-615

Psychology Literature
the laboratory as a productivity and citation unit in the publications of an experimental-psychology specialty, 639-643

Public Access Catalogs. ***See*** **Online Public Access Catalogs**

Queries. ***See*** **Natural Language Queries**

Quotations
quotations referenced in scholarly monographs (Brief Communication), 268-270

Ranking Techniques
user-friendly systems instead of user-friendly front-ends, 164-174
when is the probability ranking principle suboptimal?, 1-14

Rapid Selector
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657

Recursive Transition Network
improving disambiguation in FASIT, 101-114

Relevance
psychological relevance and information science, 601-615
retrieval testing by the comparison of statistically independent retrieval methods, 358-370
the size of retrieval sets, 72-79
when is the probability ranking principle suboptimal?, 1-14

Repertory Grid
validation of the repertory grid for use in modeling knowledge, 115-129

Requirements Documents
an object-based requirements modeling method, 62-71

Rousseau's Result
a note on a result of Rousseau for concentration measures (Brief Communication), 452-454

S/N. ***See*** **Signal-Noise Ratio (S/N)**

Schürmeyer, Walter
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 290-291

Scientific Information
the state and society: intervention in the creation of scientific information in developing countries, 323-333
technology transfer policy: its role as a scientific and technical information policy and its impact on technological growth, 80-88

Scientific Literature
an analysis of personal journal subscriptions of university faculty. part I. science, 28-33
the laboratory as a productivity and citation unit in the publications of an experimental-psychology specialty, 639-643
the skewness of science, 628-638
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383

SCISOR
intelligent information retrieval: an introduction, 180

Searchers. ***See*** **End-User Searchers**

Searching. ***See also*** **Information Retrieval**
the effectiveness of stemming for natural-language access to Slovene textual data, 384-390
evaluation of advanced retrieval techniques in an experimental online catalog, 34-53
the size of retrieval sets, 72-79

SGML. ***See*** **Standard Generalized Markup Language (SGML)**

Shaw, Ralph R.
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 286-289

Signal-Noise Ratio (S/N)
an information-theoretic measure of term specificity, 54–61

Skewness
the skewness of science, 628–638

Slovene Language
the effectiveness of stemming for natural-language access to Slovene textual data, 384–390

Social Science Literature
on the origin and meaning of bibliometric indicators: journals in the social sciences, 1886-1985, 477–487

Specificity
an information-theoretic measure of term specificity, 54–61

Speech Technology
speech technology developments in Europe (European Research Letter), 92–95

Spring, Michael B.
perspectives on information technology standards, 521–525

Stage Hypotheses
entering stage III. the convergence of the stage hypotheses, 204–209
correction [letter to the editor], 518

Standard Generalized Markup Language (SGML)
the birth of a standard, 556–558

Standard Retrieval Policy
when is the probability ranking principle suboptimal?, 1–14

Standards
the American archival profession and information technology standards, 571–575
the birth of a standard, 556–558
consortia in the standards development process, 559–565
information technology standards for libraries, 566–570
invisible hands and visible advisors: an economic interpretation of standardization, 538–549
perspectives on information technology standards [introduction], 521–525
standard setting in the United States: public and private sector roles, 531–537
standardization: understanding the process, 550–555
surrounded by standards, there is a simpler view, 526–530
a user community discovers IT standards, 576–578

Standards Development Organizations
standardization: understanding the process, 550–555
surrounded by standards, there is a simpler view, 526–530

State. *See* Government

Statistical Analysis
a general treatment of data redundancy in a fuzzy relational data model, 304–311
Lotka's law and the Kolmogorov-Smirvov Test: an error in calculation (Brief Communication), 149–150
correction (letters), 518
note on a strongly unimodal bibliometric size frequency distribution, 299–303
on the objectives of citation analysis: problems of theory and method, 448–451
retrieval testing by the comparison of statistically independent retrieval methods, 358–370

Statistical Retrieval Systems
user-friendly systems instead of user-friendly front-ends, 164–174

Stemming Algorithms
the effectiveness of stemming for natural-language access to Slovene textual data, 384–390

Structured Documents
the birth of a standard, 556–558
a two-level structure for textual databases to support hypertext access, 432–447

Syntactic Structure
a two-level structure for textual databases to support hypertext access, 432–447

Systems Theory
the communication-information relationship in system-theoretic perspective, 15–27

Technology. *See also* Standards
an empirically grounded model of the adoption of intellectual technologies, 210–224
the state and society: intervention in the creation of scientific information in developing countries, 323–333
technology transfer policy: its role as a scientific and technical information policy and its impact on technological growth, 80–88

Term Weighting
an information-theoretic measure of term specificity, 54–61

Textual Databases
a two-level structure for textual databases to support hypertext access, 432–447

Topology
topology of document retrieval systems, 658–673

Trade Policy
technology transfer policy: its role as a scientific and technical information policy and its impact on technological growth, 80–88

Unimodal Distribution
note on a strongly unimodal bibliometric size frequency distribution, 299–303

Unitized Data System
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371–383

Vector-Space Model
topology of document retrieval systems, 662–663

Weighting
an information-theoretic measure of term specificity, 54–61

Word Clustering
a model for word clustering, 616–627

Zipf's Law
a model for word clustering, 616–627

JASIS
JOURNAL OF THE AMERICAN SOCIETY FOR INFORMATION SCIENCE

Author Index to Volume 43

Adler, Sharon
the birth of a standard, 556-558
Ajiferuke, Isola
probabilistic model for distribution of authorships [letter to the editor], 96

Basu, Aparna
hierarchical distributions and Bradford's Law, 494-500
Bearman, David
a user community discovers IT standards, 576-578
Belkin, Nicholas J.
in memoriam B. C. (Bertie) Brookes, 1910-1991, 274
Bolner, Myrtle Smith
[book review], 455
Borgman, Christine L.
the convergence of information science and communication: a bibliometric analysis, 397-411
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476
Boyce, Bert R.
[book review], 456
Braunstein, Yale M.
[letter to the editor], 96-97
Buckland, Michael K.
Emanuel Goldberg, electronic document retrieval, and Vannevar Bush's Memex, 284-294
rejoinder [letter to the editor], 677-678
the retrieval problem in photography (1932), 295-298
Budd, John M.
the persistence of fraud in the literature: the Darsee case, 488-493
Burgin, Robert
improving disambiguation in FASIT, 101-114
Burke, Colin
the other Memex: the tangled career of Vannevar Bush's information machine, the rapid selector, 648-657
Burrell, Quentin L.
a note on a result of Rousseau for concentration measures (Brief Communication), 452-454

Cargill, Carl
consortia in the standards development process, 559-565
Carver, Doris L.
an object-based requirements modeling method, 62-71
Case, Donald O.
[book review], 674-675
Cater, Steven C.
topology of document retrieval systems, 658-673
Chang, Chew Lik
online-expert: an expert system for online database selection, 340-357
Chen, Guoquing
a general treatment of data redundancy in a fuzzy relational data model, 304-311
Coleman, S. R.
the laboratory as a productivity and citation unit in the publications of an experimental-psychology specialty, 639-643
Comfort, John Craig
intelligent OCR processing, 422-431
Cordes, David W.
an object-based requirements modeling method, 62-71
Cousins, Steve B.
models for hypertext, 183-191
Cox, Richard J.
the American archival profession and information technology standards, 571-575
Curtsinger, Julie M.
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383

Davis, Charles H.
[book review], 456
[letter to the editor], 96
Debons, Anthony
rejoinder [letter to the editor], 680-682
Dillon, Martin
improving disambiguation in FASIT, 101-114

Ercegovac, Zorana
a multiple-observation approach in knowledge acquisition for expert systems: a case study, 506-517
Everett, Daniel M.
topology of document retrieval systems, 658-673

Fan, David P.
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383
Feder, Nancy L.
quotations referenced in scholarly monographs (Brief Communication), 268-270
Frisse, Mark E.
models for hypertext, 183-191

Garcia, D. Linda
standard setting in the United States: public and private sector roles, 531-537
Gathegi, John Ngángá
the state and society: intervention in the creation of scientific information in developing countries, 323-333
Gauch, Susan
intelligent information retrieval: an introduction, 175-182
Goldberg, Emanuel
the retrieval problem in photography (1932), 295-298
Gorbunov, Audrey L.
multimedia: what else? [letter to the editor], 644
Gordon, Michael D.
when is the probability ranking principle suboptimal?, 1-14
Greenstein, Shane M.
invisible hands and visible advisors: an economic interpretation of standardization, 538-549

Hanson, Dan
brush up your Shakespeare [letter to the editor], 151
Harman, Donna
perspectives on human-computer interface, 152-155
user-friendly systems instead of user-friendly front-ends, 164-174
Harter, Stephen P.
information science and scientists: *JASIS*, 1972-1990, 583-593
psychological relevance and information science, 601-615
Hooten, Patricia A.
information science and scientists: *JASIS*, 1972-1990, 583-593

Johnson, Lisa
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383

Kalkhar, Santosh
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383

Keliher, Liam T.
an analysis of personal journal subscriptions of university faculty. part I. science, 28-33

Kerre, Etienne E.
a general treatment of data redundancy in a fuzzy relational data model, 304-311

Kilgour, Frederick G.
quotations referenced in scholarly monographs (Brief Communication), 268-270

Kinnucan, Mark T.
the size of retrieval sets, 72-79

Kochan, Carol Ann
the persistence of fraud in the literature: the Darsee case, 488-493

Koenig, Michael E. D.
Bush's contribution to the vision of *electronic* information systems [letter to the editor], 676-677
entering stage III. the convergence of the stage hypotheses, 204-209

Kraft, Donald H.
a call for action in response to happy days, 203
honoring the JASIS referees over the last seven years (Editorial), 335-336
in memoriam B. C. (Bertie) Brookes, 1910-1991, 274-275
rejoinder [letter to the editor], 151

Larson, Ray R.
evaluation of advanced retrieval techniques in an experimental online catalog, 34-53
experiments in automatic Library of Congress classification, 130-148

Latta, Gail F.
validation of the repertory grid for use in modeling knowledge, 115-129

Lehr, William
standardization: understanding the process, 550-555

Lenk, Peter
when is the probability ranking principle suboptimal?, 1-14

Liu, Lon-Mu
intelligent OCR processing, 422-431

Losee, Robert M., Jr.
a gray code based ordering for documents on shelves: classification for browsing and retrieval, 312-322

Loughner, William
Lotka's law and the Kolmogorov-Smirvov Test: an error in calculation (Brief Communication), 149-150

Lunin, Lois F.
perspectives on human-computer interface, 152-155
perspectives on information technology standards, 521-525

Marchionini, Gary
interfaces for end-user information seeking, 156-163

Martin, F. Douglas
information interactions between members of science-profession dyads as reflected by journal use: ichthyology and fisheries biology, 276-283

Mendelsohn, Loren D.
technology transfer policy: its role as a scientific and technical information policy and its impact on technological growth, 80-88

Molka, Judith A.
surrounded by standards, there is a simpler view, 526-530

Mowshowitz, Abbe
on the market value of information commodities. I. the nature of information and information commodities, 225-232
on the market value of information commodities. II. supply price, 233-241
on the market value of information commodities. III. demand price, 242-248

Mylonas, Elli
an interface to classical Greek civilization, 192-201

Nederhof, A. J.
internal comparison of departments' research performance in the humanities, 249-256

Noyons, E. C. M.
internal comparison of departments' research performance in the humanities, 249-256

Oluic-Vukovic, Vesna
journal productivity distribution; quantitative study of dynamic behavior, 412-421

Peritz, B. C.
on the objectives of citation analysis: problems of theory and method, 448-451

Philip, G.
speech technology developments in Europe (European Research Letter), 92-95

Pierce, Sydney J.
on the origin and meaning of bibliometric indicators: journals in the social sciences, 1886-1985, 477-487

Popovic, Mirko
the effectiveness of stemming for natural-language access to Slovene textual data, 384-390

Rice, Ronald E.
the convergence of information science and communication: a bibliometric analysis, 397-411

Rousseau, Ronald
breakdown of the robustness property of Lotka's law: the case of adjusted counts for multiauthorship attribution, 645-647
concentration and diversity of availability and use in information systems: a positive reinforcement model, 391-395

Ruben, Brent D.
the communication-information relationship in system-theoretic perspective, 15-27

St. John, Jeanette
unitized data system: a new formalism for encoding and presenting data from the scientific research literature, 371-383

Salminen, Airi
a two-level structure for textual databases to support hypertext access, 432-447

Schuegraf, Ernst J.
an analysis of personal journal subscriptions of university faculty. part I. science, 28-33

Seglen, Per O.
the skewness of science, 628-638

Shakespeare, William
[letters to the editor], 151

Shapiro, Fred R.
origins of bibliometrics, citation indexing, and citation analysis: the neglected legal literature, 337-339

Shpackov, A. A.
the nature and boundaries of information science(s) [letter to the editor], 678-680

Sichel, H. S.
note on a strongly unimodal bibliometric size frequency distribution, 299-303

Siegfried, Susan L.
Getty's Synoname and its cousins: a survey of applications of personal name-matching algorithms, 459-476

Smeaton, Alan F.
Europe, ESPRIT II, and information retrieval (European Research Letter), 89-91

Spring, Michael B.
perspectives on information technology standards, 521-525

Sun, Wei
intelligent OCR processing, 422-431

Swigger, Keith
validation of the repertory grid for use in modeling knowledge, 115-129

Tague-Sutcliffe, Jean
in memoriam B. C. (Bertie) Brookes, 1910-1991, 273-274

Thom, James A.
a model for word clustering, 616-627

Tomer, Christinger
information technology standards for libraries, 566-570

van Bommel, Martin F.
an analysis of personal journal subscriptions of university faculty. part I. science, 28-33

Vandenbulcke, Jacques
a general treatment of data redundancy in a fuzzy relational data model, 304-311

Wang, Chih
a Micronesian information system: an application of EATPUT model, 594-601

Watters, Carolyn
a two-level structure for textual databases to support hypertext access, 432-447

Weedman, Judith
informal and formal channels in boundary-spanning communication, 257-267

Weiss, Martin
consortia in the standards development process, 559-565

Wilbur, W. John
retrieval testing by the comparison of statistically independent retrieval methods, 358-370

Wildemuth, Barbara M.
an empirically grounded model of the adoption of intellectual technologies, 210-224

Willett, Peter
the effectiveness of stemming for natural-language access to Slovene textual data, 384-390

Wong, S. K. M.
an information-theoretic measure of term specificity, 54-61

Xiaorong, Fang
a study of the problem of the aging of books in university libraries: strategies for countering its effects, 501-505

Yao, Y. Y.
an information-theoretic measure of term specificity, 54-61

Zahir, Sajjad
online-expert: an expert system for online database selection, 340-357

Zhang, Weining
intelligent OCR processing, 422-431

Zobel, Justin
a model for word clustering, 616-627
